SB-10 Paver Bond starts to set within 10-15 minutes of application. Manufacturer warrants its products to conform to the published specifications. No other warranties are expressed or implied, including those of merchantability or fitness for any purpose not expressly set forth herein. The user is responsible for determining suitability of the product and proper application for their particular use. Manufacturer and any seller’s liability for incidental or consequential damage hereunder shall not exceed the purchase price of the product used.

APPLICATION INFORMATION
Cut nozzle to desired size and puncture inner seal. Apply a 1/8” to 3/8” bead of SB-10 Paver Bond using a caulking gun. On most applications, apply SB-10 Paver Bond in a ‘S’ shape. Where there is a potential for moisture infiltration such as but not limited to concrete overlays on an existing step or sidewalk, apply multiple lines of SB-10 Paver Bond running in the same direction as the flow of drainage. Set in place and tamp gently with a rubber mallet to compress the adhesive. Positioning and aligning should be done within 10-15 minutes of application.

DRYING TIME – SB-10 Paver Bond starts to set within 10-15 minutes. Full cure is achieved between 2 and 7 days depending on environmental conditions. At full cure, SB-10 Paver Bond is non-flammable and non-toxic.

CLEAN UP – Use mineral spirits or chlorinated solvents following manufacturer’s instructions and precautionary information.

**Features**

- Concrete and clay pavers, steps, coping systems, seat walls, retaining walls and caps, columns and caps, outdoor kitchens, masonry and brick, natural and manufactured stone, and slate. Also bonds to other building materials such as treated lumber, aluminum foil back sheathing, gypsum, fiberglass and composite decking materials.

**PRODUCT DESCRIPTION**

SB-10 Paver Bond is a fast set up, quick curing, superior strength, structural grade hardscape adhesive. Adheres well in extreme conditions such as temperatures ranging from 0°F to 100°F, frozen and/or damp substrates. Superior durability to withstand extreme wear and tear including heavy vehicular traffic. Helps to level and shim. Applies easily with a caulking gun.

**USES**

Concrete and clay pavers, steps, coping systems, seat walls, retaining walls and caps, columns and caps, outdoor kitchens, masonry and brick, natural and manufactured stone, and slate. Also bonds to other building materials such as treated lumber, aluminum foil back sheathing, gypsum, fiberglass and composite decking materials.
